Abstract not available for JP2001517588T

Abstract of corresponding document: **DE19741481**

The package is rectangular in shape and has side walls (14, 15, 17) with round or inclined edges (24, 25). The opposing side wall (15, 17, 20) is limited by corner edges (26, 27). The round edges or the inclined edges on the one hand and the corner edges on the other hand are diagonally opposite one another.
